### **STATEMENT OF REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

Upon careful consideration, the present claims are found to be allowable in view of Applicants' arguments dated February 10, 2006, in particular, in Brichard, one of the close prior art of record, the coating agents disclosed are waxes (see col. 2, lines 36-60), and even though one of the disclosed waxes is based on fatty acids containing at least 10 carbon atoms, said waxes are different from the sole coating (i.e. stearic acid) of the present claims. Even though Beaujean, the other close prior art of record, teaches long-chain saturated carboxylic acids containing up to 24 C atoms as one of the coating materials (see col. 5, lines 31-34), it is not seen how a person of ordinary skill in the art at the time the invention was made would have selected, in particular, stearic acid, and exclude all the other coating materials. In addition, none of the prior art of record teaches, discloses or suggests a process as that recited, wherein the amount of stearic acid applied to the particle comprising one or more alkali metal percarbonates is governed by the formula as that recited, and having a stepped pH profile when contacted with water, as required in the present claims. Accordingly, the subject matter, as a whole, would not have been obvious to one of ordinary skill in the detergent art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
